Designed to meet the large-load demands of today's vended laundry customers, Continental's L-Series Washer-Extractors provide proven reliability and energy-efficiency. Available in 75- and 125-pound capacities, L-Series Washers are easy-to-use and program.

L-SERIES HARD-MOUNT WASHER-EXTRACTORS

LARGE-LOAD EFFICIENCY

Continental L-Series Hard-Mount Washer-Extractors—available in 75- and 125-pound capacities—bring durability, efficiency and flexibility to vended laundries looking to maximize profits and reduce maintenance. Continental L-Series Washer-Extractors offer highly programmable controls, durable construction, energy-efficient technology and industry-leading warranties.

LARGE CAPACITY FOR BOOSTED REVENUE

Continental's Hard-Mount L-Series Washers are robustly constructed to effortlessly handle bulky and large loads of laundry. L-Series Washers produce a superior clean using less energy and water. Used wisely, these power machines can support new markets and revenue streams as they are utilized for wash-dry-fold services or to process laundry for commercial accounts.

DURABILITY IS IN THE DESIGN

Designed to withstand the rigors of constant use, L-Series Washers feature corrosion-resistant AISI-304 stainless steel inner and outer drums. A sturdy door bar with a heavy, reinforced door hinge protects the door window from outside impacts, and a 360-degree door seal eliminates leaking and resulting maintenance hassles. L-Series machines also feature a heavy-duty housing and double forsheda water seals to protect bearing assemblies. Engineered using a steel H-frame to effectively transmit vibrations away from the machine to anchor locations, L-Series Washers are constructed to last! No wonder they're backed by an industry-leading ContinentalCare™ warranty including 3-years limited parts coverage, 10-year key component coverage and 4-year bearing replacement labor coverage!

EFFICIENT PERFORMANCE

L-Series Washers are smartly designed without a sump secured to the outer tub. This drastically cuts the water required for every fill. Moreover, an advanced drive system not only delivers high-performance operation, it heightens energy-efficiency. Finally, a highly programmable control further enhances energy-efficiency by giving storeowners precise control over water levels, wash temperatures by degree, and pre-wash and rinse cycles.

PROGRAMMABLE CONTROLS OFFER FLEXIBILITY IN WASH, VEND, MARKETING & MORE

Continental's Coin Microprocessor (CM) Control unleashes superior flexibility with four program selections—Hot, Cold, Warm and in SuperWash™. The control, which interfaces easily with both coin and card systems, allows storeowners to customize wash processes, including wash time, water levels and temperature, as well as vend price by the time of day or day of the week. Therefore, vend prices can change easily according to each program's energy-efficiency—curbing gas and water usage and effectively shortening the time it takes customers to complete their laundry.

EASY TO USE AND MAINTAIN

Making for easy use, L-Series Washer doors open a full 180 degrees for simple loading and unloading. A self-cleaning, four-compartment dispenser for powders and liquids makes adding detergents quick and easy. Plus, the machines are available with automatic chemical injection inlets for laundries interested in expanding services while increasing profits. Facilitating ease of use, the control illuminates time remaining until wash completion and a diagnostic readout helps owners pinpoint machine errors and needed maintenance.
