

PS SERIES

Sheet Folder and Stacker

1, 2, or 4 lane
with or without crossfolding

Processes:

- Sheets
- Table Cloths
- Napkins
- Pillowcases
- Flat Goods

The PS Folder and Stacker from B&C Technologies offers high quality construction with a simple design for ease of use. Service is easy - common components are used and our simple design utilizes fewer parts. Fewer parts means less breakdowns and more productivity. The powerful controller is fully programmable and includes built in diagnostics for easy troubleshooting and repair. Easy programming leads to perfect results time after time. The B&C folder can be configured with 1, 2, or 4 lanes with two primary folds and optionally three cross folds. Combine this reliable folder with the labor saving B&C Stacker for greater productivity. The stacker creates stacks of folded goods and the conveyor takes the goods to either the front or the rear of the machine. Simple to operate, built to last and easy to afford.

Folder / Cross Folder

- ◆ 1, 2, or 4 lane configurations
- ◆ Compact size
- ◆ Inverter driven
- ◆ Static bar
- ◆ 2 primary folds
- ◆ 3 cross folds
- ◆ Self diagnostics
- ◆ Safety controls
- ◆ Bypass all folds
- ◆ Self centering cross fold plate

Sheet Stacker

- ◆ Belt Drive
- ◆ Easy maintenance access
- ◆ Preset counter
- ◆ Full bypass
- ◆ Electronic measuring

Technical Specifications:

Electrical Connection:

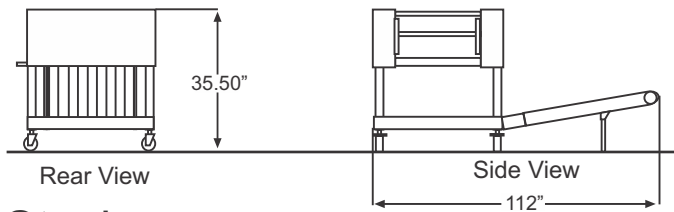

230V, 3ph, 60Hz, 15A
breaker
460V, 3ph, 60Hz, 15A
breaker

Pneumatic Connection:

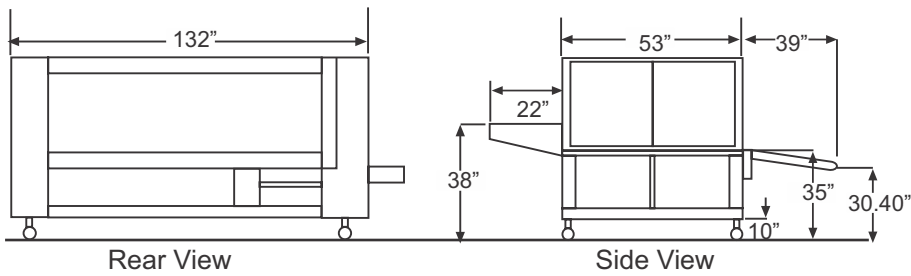

100 psi / 7 bar
1/2" / 13mm connection
5 CFM / 8.5 cubic meters/hr
8 CFM / 13 cubic meters/hr

Weight:

2800 lbs
1280 kg
