# ClearView VTM

The ClearView Takes the Next Step in the Evolution of the Value Adder Series - Adding the Power of the Internetsh

For over a decade the Value Adder Plus VTM has been in service in thousands of laundry rooms across the nation. Convenience, security and reliability have made it the most popular VTM on the market. ESD has now utilized the power of the Internet to add on demand reporting and complete transparency to one of its most successful products. Built in the same cabinet as the Value Adder Plus Hi-Security, ClearView now shares the reputation of being the most secure Value Transfer machine on the market. ClearView has an on-board computer that communicates over the Internet to a server recording every transaction. Every currency insertion is tracked and recorded with available real time reporting - 24 hours a day, 7 days a week. ESD has designed a complete suite of reports to monitor and manage all activity including the real time current cash total in the VTM. The ClearView features colorful graphics that offer very simple directions in friendly bi-lingual text and a bright vacuum florescent display.

Front Access —11-100-012
Rear Access — 11-100-013

The ClearView can be mounted on a wall surface, embedded between studs, or on an optional pedestal base. The VTM is shipped with two right angle brackets for attaching to the wall studs.

The Optional Pedestal Base is ESD Part Number - 70-050-200. The high security guard to cover the two Medeco locks is ESD Part Number 70-050-271. To secure the guard in place a Medeco hockey puck lock and Medeco deadbolt lock – ESD Part Number 72223 is required. While ESD believes the cabinet is designed to discourage compromise, it is the responsibility of the operator to make certain that the VTM installation is secure.
