

ESD POS System

ESD's Point of Sale Hardware and Software is Designed for Retail Laundry and Dry Cleaning Operations to Manage Drop-Off Business, Retail Sales, Inventory Control and Employee Attendance

The ESD POS System is a package that includes both Hardware and Software. POS allows an operator to manage all aspects of their business from drop-off laundry, dry cleaning, alterations and over the counter sales, to inventory control and function as employee time clock. With the easy to use POS touch screen operation, order entry, customer information and detailed order instructions are entered into the system in just seconds. POS is completely bi-lingual and allows the operator to choose between English or Spanish displays. The POS System features bright and easy to read icons throughout making the ESD POS system the most user friendly product available in the industry.

Inventory control and retail product sales utilize an easy to use bar code scanner and with the optional digital drop-off scale, orders can be tracked by the ounce; the thermal receipt printer prints in triplicate for drop-off orders providing the customer with all details. POS comes standard with a lockable secure cash drawer and pin number activated system, it is possible to track every dollar in the store touched by each employee.

**Computer, Monitor, Cash Drawer
Display Tower and Software —11-900-022
Add Credit Card Acceptance —11-900-023
Add Electric Scale —11-900-029**
