

SmartLink CardSlides

SmartLink CardSlides accept both SmartCards and Magnetic Stripe Cards and connects to the Internet using wireless technology

A SmartLink reader provides stand-alone SmartCard payment acceptance with no need for an on-site, or off-site data base to approve vend starts because the information is on the card. The real versatility of the SmartLink CardSlide is that it will also read a Magnetic Stripe card which allows it to accept credit and debit cards. Every SmartLink CardSlide in the laundry is connected to the Internet through reliable wireless technology which is achieved through use of an on-site modem, or air card. If the Internet goes off-line for any reason, the SmartLink CardSlide continues to accept SmartCards to keep all the machines operational. This flexibility allows the operator to accept SmartCards and credit and debit cards on every machine. Finally, SmartLink offers an operator the ability to monitor and interact with each machine in the laundry through ESD MyLaundryLink website which offers full accountability of all revenue.

SmartLink — 11-016-XXX
BlueFace — 11-016-XXX

SmartLink CardSlide Benefits:
