## American Changer Products

### AC7705 Bill & Coin Changer - Rear Load

This rear load Changer is designed to break larger bills into smaller bills of one denomination and coins (or tokens). Recommended for Car Wash and Laundry applications, it is designed with an Industry First Pull-Away Face Plate to minimize repair costs. Most customers have \$10 & \$20 bills, yet nobody wants 80 quarters or tokens from a changer. Those unused coins leave your store, making you visit the bank, more often, to replenish your quarters. Save time and money! Our machine features a dispenser made by "LG" which is used by several Fortune 500 companies, in Kiosk's. This machine breaks large bills and eliminates your lost sales and attendant costs, driving up profits and customer service.
