American Changer Products

AC7815 Multi-Bill Changer - Rear Load

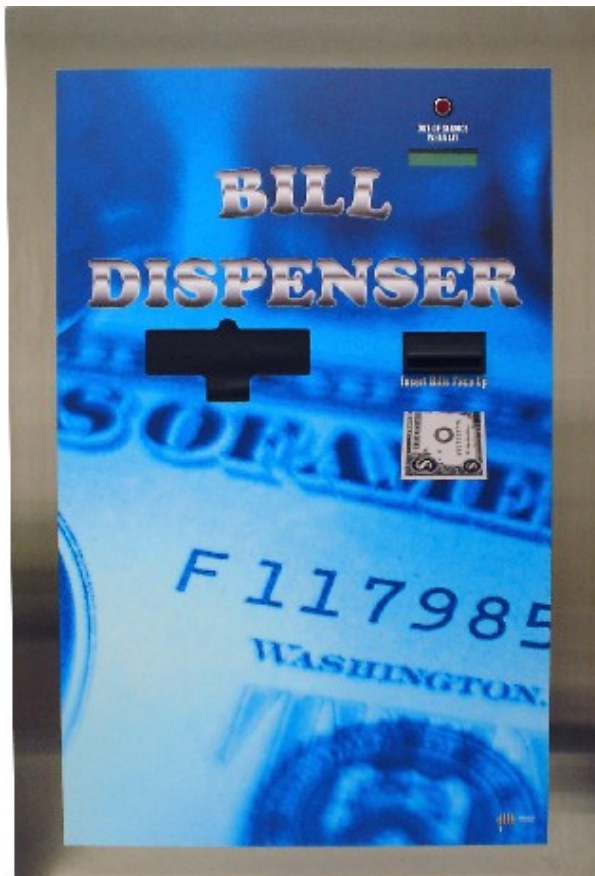

This rear load multi-bill changer is designed to break larger bills into smaller bills of "two" denominations. It features a high security design, Pyramid validator and a 2-700 note cartridge dispenser. It's designed with a Stainless Steel Face Plate. Most customers have \$10 & \$20 bills, yet nobody wants 80 quarters or tokens from a changer. Those unused coins leave your store, making you visit the bank, more often, to replenish your quarters. Save time and money! Our machine features a dispenser made by "LG" which is used by several Fortune 500 companies, in Kiosk's. This machine breaks large bills and eliminates your lost sales and attendant costs, driving up profits and customer service. This model is ideal for the Vending, Car Wash, Laundry and Amusement Industries.
