

## Desk Top VTM

**A Manually Operated, Compact Device Used to Read and Add Value to SmartCards and Magnetic Stripe Cards**

The DeskTop VTM is a compact and portable device designed to read the value on a SmartCard or Mag Stripe Card and increase or decrease the value of the card manually. This VTM is sometimes used in Laundromats where it can serve as a backup to a larger VTM. It can also be employed as one of the components used to facilitate a change of the site code when a location is sold.

More often, the DeskTop VTM is found in a multi-housing venue where office personnel can receive a resident's payment and add value to their laundry card. In order to maintain Accountability of use, key cards are issued to each person to access the VTM. Management can then use an audit card to view all transactions by each person who has been issued a key card. Up to three people can be issued unique key cards.

UL Listed to the U.S. and  
Canadian Safety Standards.
