

Installation & Usage Guide

Description

Collection Card Management System (CCMS) is a freestanding software module designed to easily read, display, and store audit reports from Heartland MicroPayments - MoneyClip Cashless Payment System devices. Data Collection Cards are read by CCMS, and a PDF copy of the audit report is automatically displayed to the PC operator.

It can run independently of other MicroPayments audit programs (e.g. Debutil), or concurrently with them.

The latest Adobe PDF Reader application will be required to operate the CCMS program. It is freely available at this link: http://get.adobe.com/reader/

Kit Contents

MSYS-CCMS			Collection Card Management System	
Item Qty Part Number		Part Number	Description

Software Installation Instructions

Connect the smart card reader to an available USB port on your PC, and allow it to be discovered and readied for use.

If the target PC cannot locate the required drivers to run the card reader, it may be necessary to download and install them, manually. They are available for a wide range of PC operating systems at :

Using the supplied CD,

install the CCMS program.

http://www.hidglobal.com/driverDownloads.php

Follow the onscreen prompts to complete the installation.

After installation is complete, you will see this icon in your system tray.

8-52 AM

8/14/201

Right-click on this icon to check its' status, and to access the configuration menu.

It may be necessary to expand the System Tray to see the CCMS icon.

Configuration

Select 'Configuration'

The CCMS Configuration screen will show you the current settings for all program functions.

Each setting will be discussed in the following sub-sections.

Configuration

Cancel Save			

MICROPAYMENTS

PDF Storage Location

PDF Storage Location

C:\Users\Public\Documents\CCMS\

This is where the PDF copies of all reports will be automatically stored. If another location is desired, select the file/browse button to the right, and specify the new location.

Creating DBU Files

Create DBU Files For Import By Debuti

When this flag is checked, the CCMS program will automatically create *.DBU files (importable by Debutil) and store them in the default location for these files. If the flag is not checked the program will skip this step.

Single PDF Report Option

Create Single PDF For Multiple Reports On Card

When this flag is checked, the CCMS program will automatically create and save an individual PDF report file for each audit file that it reads from a Data Collection Card.

For example, if a single card is used to collect 3 Cash to Card units the CCMS program will create three distinct PDF reports: The files are named by the date they are created, and an incrementing sequence number (as shown).

Lo	Local Disk (C:) Users Public Public Documents CCMS Search CCMS

	🏂 2012-08-15-002.PDF	8/15/2012 1:46 PM	Adobe Acrobat D	29 KB			

If this option is <u>not</u> <u>checked</u>, the program will create a single PDF document, which will contain three pages (one for each device that has been collected).

Auto-Open PDF's

Automatically Open PDFs After Reading

When this flag is checked, the CCMS program will automatically launch the Adobe PDF reader, and display the downloaded reports to the PC operator, in sequential order. If this option is not selected, the PDF files are simply stored in the specified location (**see 6a**) and can be reviewed later. A notification is provided.

When this flag is checked, the CCMS program will automatically **ERASE** (i.e. delete) any audit file stored on the Collection Card, after they have been successfully copied and displayed to the Operator. If the option is not selected, the operator will be prompted to erase the card after each

read session:

Note: Choosing this automatic option, or clicking [Yes] for the manual erase, <u>is permanent</u>. There is no way to recover an erased report from a Collection Card.

Auto-Formatting Blank Collection Cards

Automatically Format Blank Collection Card

When this flag is checked, the CCMS program will automatically format any un-primed (blank) Data Collection Card that is inserted into the smart card reader. The Collection Card will be formatted with the key-set that has been loaded in the program with a SYSTEM KEY CARD. This will be detailed in Step 8.

If this option is not selected, a prompt will be displayed if a blank Collection Card is inserted into the smart card reader.

	Confirm
	Format Blank Collection Card?
	Yes No
7g	Selecting the Select Smart Card Reader Smart Card Reader
This c the pr drop c	ption allows the operator to select which smart card reader ogram will use. If multiple card readers are available, the lown list will display the options.
7h	Saving the Settings
Once [Save	all options have been set to the desired behavior, click I to confirm and exit the Options screen.

Loading System Keys into CCMS

Before the CCMS program is ready for use, it must be loaded with a **SYSTEM KEY CARD**. Upon insertion, the operator will be asked to confirm the Key load:

	X
use"?	
Yes	No
	use"? Yes

If the Key set already exists, a notification is provided:

In	format	tion	X

Formatting a Collection Card

Formatting a Bank Collection Card

Before the Collection Card can be used it must be formatted. If a Blank Collection Card is inserted, the program will prompt the operator if they wish to format it:

If [YES] is selected, the operator must select which Key set to use (if multiples exist). Choose the desired Key and click [Select].

Select Installation
Select Installation inhouse office 5
Select Cancel

When the formatting is complete the operator will be notified. Clicking [Yes] will prompt the operator to remove the card.

Confirm	
Collection Card Formatted!	Remove Card
Yes No	Remove Card
	Cancel

Collecting Audit Data from a Card Reader

- While the reader is in its' idle state, insert the Data Collection Card into the card reader.
- 2. The display will show "**READING**".
- The reader will identify the card type as "COLLECTION CARD".
- After writing the Debutil file to the COLLECTION CARD, the reader will clear the Period data
- The reader will display "REMOVE CARD" when it is safe to do so.

INSERT YOUR CARD

READING...

COLLECTION CARD

CLEARING

REMOVE CARD

This process is repeated for each Revalue station collected.

View & Saving Audit Report

If the Auto-Display option is ON (see step 7d) then the PDF report will appear on the screen for review.

These reports are identical to standard Debutil Audit Reports and should be analyzed in the same manner.

Un-Loading a Data Collection Card

Ensure that the CCMS program is running on the PC (see steps 4 & 5 for verification). Insert a Data Collection Card into the smart card reader. A notification will be shown to indicate that a PDF of the audit report has been created.

OK

View & Saving Audit Report

Un-Loading a Data Collection Card

After CCMS has displayed all of the available reports on the card, it will be automatically erased, and the operator will be notified that this action has occurred.

Information	×
Card Erased!	
	ОК

If CCMS has **NOT** been set to automatically erase the collection card (see **Step 7e**), the operator will be given the choice of erasing the card at this time.

Confirm	
1	Erase Collection Card?
	Yes <u>N</u> o

Note: Using the Automatic Erase option, or clicking [Yes] for the manual erase, <u>is permanent</u>.

There is no way to recover an erased report from a Collection Card.

Saved Audit Reports

To review previously saved audit reports, browse to this location on the PC:

C:\Users\Public\Public_Documents\CCMS\

If another file storage location was chosen during Step 7a, then browse to that location.

A individual sub-folder will be shown for each separate Installation that has been created **(see Steps 8 – 10).** Each saved report will be stored in the folder that matches the Installation that it belongs to.

In this example, there are three installations, and the one titled 'Route 1' has been opened to show all of it's stored reports.

CCMS and Debutil

Using CCMS Concurrently with Debutil

Although it is not required, CCMS can be configured to make the traditional DBU files available for importing into Debutil. See **Step 7b**. If this option is desired follow these steps to use the collected audit files with Debutil.

- Launch the Debutil program on the PC, and click the "Import" button.
- The sub window appears, and allows you to select the audit file you wish to process.
 - The files that have been read from the Collection Card by CCMS will appear in the target folder.
- Select the file to import, and click 'Open'. The files are treated just as previous Debutil audit files have been.
