

WavePoint

Revalue Station

Heartland MicroPayments is pleased to introduce the most innovative revalue station in the Laundry Services market, **WavePoint.**

The WavePoint is stacked with features that will completely change the way you think about adding value to smart cards.

Have you ever wished that you could start accepting credit, debit, or EBT cards at your revalue station without adding any hardware, or *even visiting the location?*

Have you ever wanted to know if it was necessary to send a collector to your revalue station, *because the stacker may only be ½ full?*

Do you know, right now, if your revalue station is *low on receipt paper?*

Did someone just *open the door* on your revalue station?

If your revalue station is a **WavePoint**, the answer to all of these questions, and more, is **yes.**

KEY FEATURES
