

WaveVision

customer

Heartland's **WaveVision** application is a fantastic way for your customers to enjoy the benefits of the WaveRider system.

Now, your residents can know, **before they visit the laundry room**, how many machines are available for use, and how much time is left on the machines that are currently running.

Once they start their laundry, they can **monitor the status** of their cycles, on demand, from the convenience of our easy to use mobile-website.

Even better, when a cycle is complete, your customers can receive a **text message** that lets them know their laundry is ready.

- See which machines are available for use
- Verify how much time is left for a cycle
- Get a text message when their socks are dry

WaveVision

customer

1

A Customer checks the website to see if machines are available

2

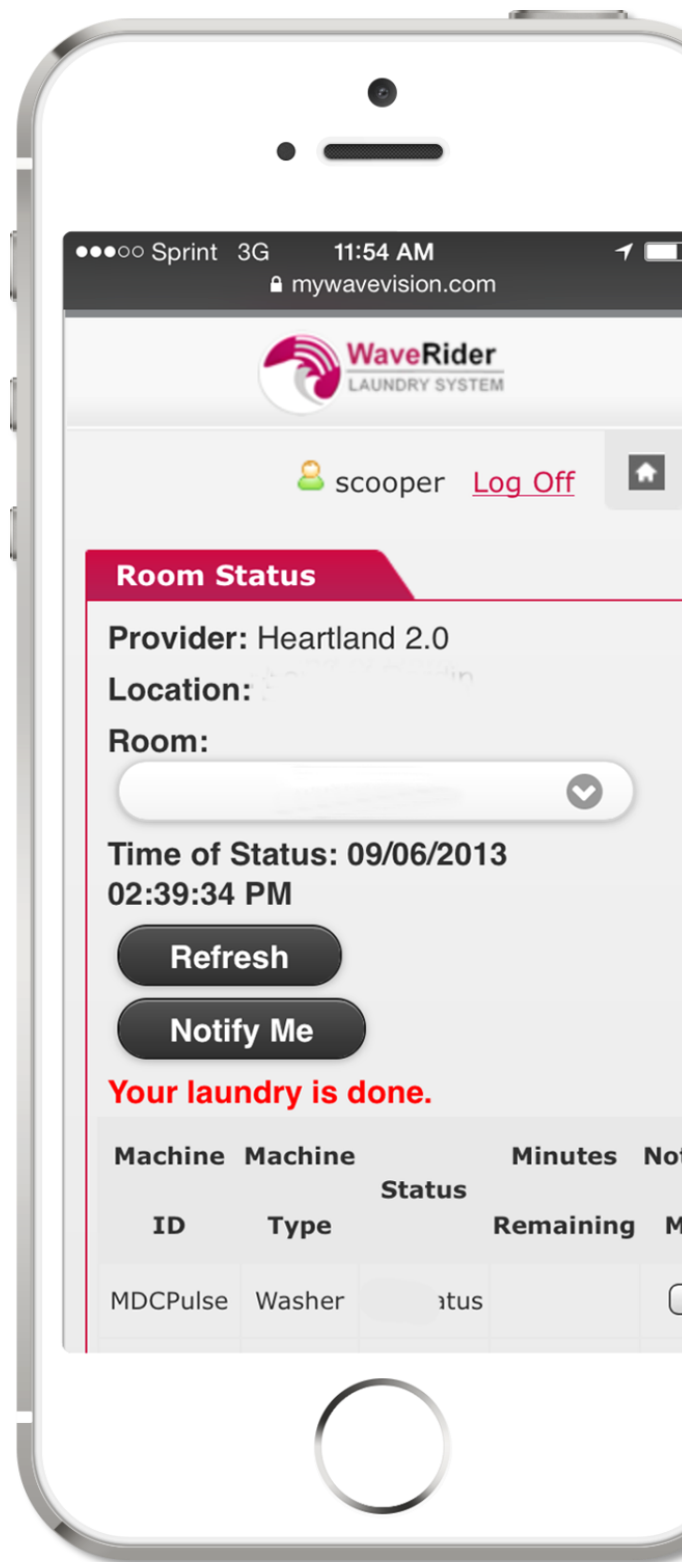

Two washers are open. The customer is happy. *Because they didn't have to carry their laundry down three flights without knowing.*

3

The Customer swipes their payment card to start their laundry. No waiting, no quarters, no hassle.

4

The Customer can now get on with the rest of their day, and receive a text message when their laundry is done.
